I was born on
27th May, 1970.

My favourite structure (designed by someone else)
Changsha Meixihu International Culture & Arts Center in Changsa, China by Zaha Hadid; City of Arts and Science in Valencia, Spain by Santiago Calatrava; Walt Disney Concert Hall by Frank Gehry.

I am inspired by
Dynamism in abstract forms.

Designing to me is
An elixir of life.

I wish I had designed (and how would that have been different from now)
The master plan for the city of Mumbai, as I believe that a city should be designed to improve the 'quality of life' for its citizens.

My worst design
Hope I never execute a project to fit this category.

My signature design element (one element without which no design of yours seems complete)
I consciously try not to put a signature design element, as I believe that each project should have its own unique identity.

To unwind
I play the piano and listen to western classical music.

If I was not an Architect
I'd be a film director, a music composer, a teacher or a product designer.

Society Interiors to me is
Sign of the times.
